

Since 1940 Serving our Clients

COMMONWEALTH PLYWOOD Inc. (CPI) is part of America's leading companies focusing on decorative wood products.

The company has been providing superior products and services since 1940 to its customers all around the world.

SUSTAINABILITY AND THE ENVIRONMENT

Commonwealth Plywood is committed to the sustainability of our forests. We emphasize and implement sustained yield forestry management.

Our products are made with aspen & Tulip Poplar logs from sustainable-managed forests. Aspen & Tulip Poplar produces superior hardwood plywood, and it's one of the best species for sustainable forestry; it naturally regenerates from root sapling once the main trunk has been harvested and is a post disturbance species as well.

OUR ADVANTAGES

MADE IN USA

We produce our products in the USA from forestry to distribution. No fluctuating exchange rates with us.

SUSTAINABLE PRODUCTION

We emphasize and implement sustained yield forestry management. Ask for our FSC® and CARB2 products.

SUPERIOR PRODUCTS

Commonwealth Plywood provides premium quality engineered plywood for your finished product.

LEED ACCEPTED

Our products are accepted under LEED V4 formaldehyde requirements

QUICK LEAD TIMES

We provide your products in 2 weeks or less.

SUPERIOR CUSTOMER SERVICE

Quick and accurate customer service. Our sales associates have been in the industry for over 15 years.

INTERNATIONAL ALLIANCES

CPI Whitehall is part of Commonwealth Plywood Co. Ltd., one of the largest rotary veneer produces in North America, with 5 veneer mills and 2 plywood plants
